### **SKILLS**

Languages: Python, C++, C, TypeScript/JavaScript, Perl, Shellscript, SQL, Dart

**Tools/Frameworks**: Git, Flask, Django, Node.js, SQLite, MongoDB, Docker, Svelte, React, React Native, Flutter, HTML, CSS, Bootstrap, Jira, Confluence, Figma

### **▶ EXPERIENCE**

Move With Fleet

**Full-stack Engineer** 

Jan 2022 - Apr 2022

(Remote) Toronto, ON

- Built frontend React components for administrative HR platform and employee analytics according to Figma specifications
- Built cross-platform React Native mobile app to manage geophysical trips and basic profile data, implemented appropriate accompanying backend logic
- Designed simple and scalable Django unit testing suite to verify monetary rewards processing using Pytest-Django

**Software Developer** 

Jan 2021 – Apr 2021

eCompliance

(Remote) Toronto, ON

- Ensured software reliability by developing Flutter integration test framework for iOS and Android apps, expanding test coverage to 100%
- · Reviewed pull requests to ensure maximum code quality and avoid bugs

# **ASIC Development Assistant**

Sept 2019 - Dec 2019

Huawei

Ottawa, ON

- Built Flask app to periodically aggregate on-site hardware data into usable data visualizations
- Offered live support in Mandarin to oversea offices in order to setup the app in high-security environments
- · Wrote reusable Python scripts to parse data from poorly-formatted text files into organized SQLite tables

QA Specialist Jan 2019 – Apr 2019

OpenText

Waterloo, ON

- Improved app deployment reliability by developing and maintaining Jenkins CI/CD pipeline with TeamCity and Artifactory integrations
- Upgraded Docker container architecture to better align with industry Linux practices

## PROJECTS

## Ø osulist.com

- Built a CRUD web app for easy creation and sharing of custom osu! rhythm game assets using Flask and MongoDB
- 24/7 up-time, served with Nginx and Gunicorn on a personal DigitalOcean droplet
- Designed a simple yet information-dense UI to streamline site navigation experience (inspired by Hacker News)

#### yf bot

- Developed a general-purpose Discord bot for testing and learning about various unrelated technologies
- Built a feature to generate linguistically "accurate" tweets for any given Twitter account using Markov chain-based natural language processing
- Created a command to help osu! mappers track their mapping progress using data fetched from the osu! API

# **EDUCATION**
